Summary

M.S. graduate in Robotics and Autonomous Systems (Artificial Intelligence) with experience building machine learning systems, computer vision pipelines, and AI-driven applications. Skilled in developing end-to-end intelligent systems using deep learning, LLMs, cloud technologies, and real-time perception frameworks.

Education

Arizona State University, Tempe, AZ — *May 2026*
M.S. Robotics and Autonomous Systems (Artificial Intelligence) — GPA: 3.9/4.0

VIT-AP Institute of Technology, India — *2024*
B.Tech in Computer Science (Robotics) — GPA: 9.41/10

Technical Skills

Programming: Python, Java, C, SQL
AI/ML: Machine Learning, Deep Learning, Computer Vision, Large Language Models (LLMs), Statistical Modeling
Frameworks/Libraries: PyTorch, Scikit-learn, NumPy, Pandas, OpenCV, YOLOv8, OpenAI API
Robotics: ROS 2, Autonomous Systems, Perception Systems
Cloud/Databases: AWS, Firebase, MongoDB
Tools: Docker, Linux, Git, Tableau

Projects

Autonomous Perception System — *2026*

- Developed an autonomous perception pipeline inspired by self-driving systems.
- Implemented object detection and scene understanding modules.
- Designed a modular architecture supporting experimentation and scalable deployment.

Emotion-Aware Analytics System (LLM Pipeline) — *2025*

- Developed a real-time sentiment analysis system using OpenAI APIs.
- Built backend pipeline using Firebase and Google Sheets for data processing.
- Designed visualization dashboard for time-series emotional trend analysis.
- Integrated LLM-based inference into production-style analytics workflow.

AI-Powered Assistive Vision System (Real-Time Perception Pipeline) — *2023–2024*

- Designed and deployed a real-time computer vision system using YOLOv8 and Random Forest (91% accuracy).
- Built an end-to-end perception pipeline integrating ESP32-CAM, inference, and Telegram-based alerts.
- Implemented backend system using MongoDB for real-time data storage and retrieval.
- Engineered system for low-latency inference and real-world deployment constraints.

Experience

Graduate Service Assistant (Teaching Assistant) — *08/2025 – 12/2025*
Arizona State University

- Supported Applied Data Science II and Applied Econometrics; guided students on data analysis and statistical modeling.
- Evaluated assignments ensuring correctness in data processing and model outputs.
- Provided guidance on data pipelines, regression models, and analytical workflows.

Database Intern — *01/2024 – 06/2024*
RINL – Vizag Steel Plant

- Worked on database management and data processing for warehouse operations.
- Assisted in data integration and ensured consistency across systems.

Publications

IEEE Xplore Publication — Cognitive Assistance System for Dementia Patients
DOI: 10.1109/ICETSIS61505.2024.10459484

Certifications

AWS Certified Solutions Architect – Associate Artificial Intelligence Analyst – IBM
Applied Machine Learning – Boston IT Solutions MATLAB for Data Processing – MathWorks
